

AUSTRALIAN BREASTFEEDING ASSOCIATION

About the Australian Breastfeeding Association Feedback

Thank you for your interest in our association. We hope you will continue to discover more of how the association works and encourage you to give us your support. This can take many forms — from becoming a subscriber or member to attending local group activities; promoting breastfeeding and encouraging other breastfeeding mothers; using your interests and skills on one of our many working groups; being further involved in our community education program or even counselling. Your support means that mothers can continue to benefit from the breastfeeding information and positive encouragement provided by the Australian Breastfeeding Association.

The following feedback form gives you an opportunity to comment on the work we do. It also acknowledges that you have attended an *About the Australian Breastfeeding Association* group discussion meeting, have examined an *About the Australian Breastfeeding Association* package from head office or have learnt about us from the website. Completion of the feedback form is strongly recommended for those wishing to become group helpers, and is a prerequisite for members who are interested in training to become a community educator or breastfeeding counsellor. Please print this off to complete. Forwarding details are at the end.
